

# License Activation Guide

1

Your Qeeps License is supplied with a CD containing a Qeeps User Guide.

Before you begin you will need the 18 digit license key printed on your disk.

XXXXXXXX-XXXXXXXX-XX

2

You should ensure that your DVR is accessible over the internet. You can test this using the client software or web page provided with your DVR.

Consult your installer or DVR manufacturer for help with making your DVR accessible over the internet.

3

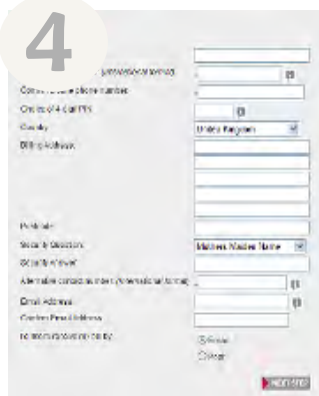

In a web browser, go to: <http://www.qeeps.com>

Click on 'Qeeps Activation' to begin the activation process.

A separate pop-up window will launch to guide you through the activation.

4

The first section asks you for some contact details.

The mobile phone number and PIN specified on this page are your login details to Qeeps on your mobile phone.

Click 'Next Step' when ready.

For an explanation of any field, click the information button.

5

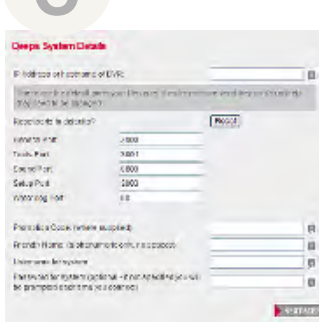

You will next be asked to provide details of the DVR, and of your Qeeps License Key.

Select your DVR type from the list.

Some DVRs require you to perform another step - such as setting the 'Site Name' to a supplied value. Follow the on-screen instructions.

6

Provide the required information about your DVR, including its IP Address and ports and user name.

For dynamic IP addresses, you can enter a dynamic DNS host name.

You can optionally supply the password of your DVR to enable 'fast login'.

7

Select a tariff from the options provided.

Each tariff has a monthly cost, and a number of inclusive streaming minutes.

If you are activating a trial license, you will not be asked to select a tariff.

8

After accepting the Terms and Conditions, you will be taken to our secure Credit Card provider site and asked to supply details of a card to use for payment.

Invoice customers and trial users will not be asked for card details.

At the end of the process you will be sent an SMS with details of installing the Qeeps application to your phone.
